

# OUTDOOR ARCHITECTURAL LIGHTING

THORN

# Product Page Key

THORN

This spread is intended to help the reader to find and use the product information for the Thorn products, which is set out in a consistent form

## SAP Code

Thorn Lighting has implemented a common SAP computer system to bring greater flexibility and process transparency. This enables the company to introduce shorter ordering references.

## Illustrations

These give basic product dimensions in inches. Illustrations are not to scale.

## Specification

These appear for most products and are set out so that the specifier can photocopy the relevant clause, define the details and attach it to the order.

## Photometric Data

The photometric data shown on the product pages is intended to give an indication of the characteristics of a product or range of products. It is not intended for lighting design data, but to aid the selection of products - directly or by comparison with other luminaires prior to design.

The photometric data for each category of luminaire is expressed using different data elements.

## Standards Compliance

Luminaires are deemed IP20 unless stated otherwise. EN 60598 is stated to signify that all Thorn products are designed and manufactured to EN 60598 (BS 4533).

The vast majority are also manufactured in a quality assured environment to EN ISO 9001.

## Certification

Luminaire shall be certified for Indoor/Outdoor use, wet location, to meet UL 1598 standards and CSA Std. C22.2 NO.250.

## Alumet

Alumet is an elegant lighting feature, which is suitable for both classic and modern architecture

- Suitable for pedestrian precincts, building surrounds, shopping centers, parks and business centers
- A sleek and minimalist shape provides distinctive lighting effects by night and decorative urban effect during the day
- Exceptional visual comfort
- Electronic ballast ensures energy saving capabilities
- Ideal for creating visual guidance
- White light with good colour rendering
- Ballard version available on request

**Materials/Finish**  
Column: extruded aluminum, 984" Ø 784" finish powder coated light matt grey  
Top canopy: die-cast aluminum, finish powder coated light matt grey  
Diffuser: opal impact-resistant acrylic, 3.77", Ø 787"

**Installation/Mounting**  
Overall height: 1634" (with lit part of 4528")

- Easy installation:
1. Ballast is housed inside the pole. Weight of gear is held by safety chain.
  2. Base of lamp compartment secures by interior screws to enable a smooth exterior line between pole and illuminated section.
  3. Top casting clamps the diffuser in place. Easy access for lamp replacement by using the M6 thread to remove the canopy.

**Specification**  
To specify state:  
Decorative lighting column for 2 x 55W T5 compact fluorescent lamps with powder coated matt light grey aluminum pole.  
As Thorn Alumet.

**Certification**  
Luminaire shall be certified for Indoor/Outdoor. Use, wet location, to meet UL 1598 standards and CSA standards.

**Ordering Guide** Lamps to be supplied separately  
For complete fitting specify head and pole

## Outdoor Lighting Data

This data enables illuminance lighting design for subsidiary roads and pedestrian areas.

• Design attitude  
Angle between a reference axis on the luminaire, often the spigot entry axis of the luminaire and the horizontal.

• Recommended mounting height  
A suitable mounting height or range of heights for the lantern above the ground. The isolux diagram data is based upon one height.

Contact North Star Lighting for more detailed photometric data.

- Utilization factors  
Road side and house side of the lantern utilisation factors for a range of width to mounting height ratios. The data may be used to calculate the average illuminance over an area.

W1 is the road side width between the luminaire and the rear side of the far footway or other boundary line. W2 is the house side width between the luminaire and the rear side of the near footway or other boundary line. H is the mounting height.

A range providing genuine 100% indirect lighting, outstanding visual appeal, and precision light control

**Design:**

- Addresses outdoor indirect lighting issues, providing an increased downward light output ratio, whilst reducing light pollution
- Two new technologies developed (patents pending) - a 'rectangular light' projector and the Mosaïque® reflector
- Precision optical system gives very low glare rating

**Optical Principle**

**Primary source:**

The projector, which contains a ceramic metal halide lamp (choice of 3000K or 4200K), generates light and directs this 'rectangular beam' onto the reflector. A control ring precisely shapes the beam to ensure maximum light capture by the reflector. The projector's precision reflector optic ensures maximum output.

**Secondary Optic:** 70 or 150 Watt Metal Halide G12 lamp. A top plate with reflector captures the light emitted from the projector and reflects it to the ground. There is a choice of three reflectors: Mosaïque® types 1 and 2 or plain white. The innovative Mosaïque® reflectors improve the performance of indirect lighting. Each comprises of 24 tiles, configured together in

two arrangements: type 1 which throws more light towards the longitudinal direction and type 2 which throws light towards the transverse direction. Each tile comprises of nine cells and has three layers: a coat of protection paint, a metallised coat and a transparent PMMA skin to protect it and offer a wipe clean surface. The result is 97% containment of light on the top plate giving better efficiency and ultra-low light pollution, whilst maintaining outstanding visual comfort. The DLOR is around 50% and a typical scheme has a threshold increment (TI) lower than 4%. The reflectors combine with different arm configurations and tilt angles to produce various light distributions, therefore suitable for many street and amenity applications.

Aviso B with mosaïque reflector

**Luminaire**  
The projector and tiltable top plate are connected by the luminaire body/arm. There is a choice of two arm shapes with a further selection of dedicated columns (recommended 0.5' and 17' high). The Aviso A arm is post top mounted and the Aviso B is bracket mounted with a wide downlight beam feature for decorative effect. The electronic gear is column based and connects via a plug and socket to the projector.

Aviso A with white reflector

Aviso B - 4° or 10° tilt angle

Aviso A - 0° or 6° tilt angle

## Materials/Finish

White reflector: pressed sheet aluminum, coated with white high reflectance polyester paint. Mosaïque® reflector: pressed sheet aluminum, metallised reflector protected by transparent PMMA. Projector: Inside: anodized spun and pressed aluminum reflector. Outside: die-cast aluminum, textured sandy grey 150 (Akzonobel) powder coat. Projector closure: tempered glass (for use with white reflector) or anti-glare treated flat glass (for use with Mosaïque® reflector). Aviso B. Luminaire body: die-cast aluminum, textured sandy grey 150 (Akzonobel) powder coat. Aviso A arm: hardened die-cast aluminum.

## Installation/Mounting

Lantern recommended mounting height 13.2'-19.7'. Post-top lantern: Suitable for 2.4" Ø x 4' long spigot. Control gear unit: mounts in column. Supplied with lamp. Column: Flange mounting, 10.67" flange fixed via four fixing bolts at 787" centers. Bolts not supplied.

## Specification

To specify lantern state: Die-cast aluminum indirect lantern for post top mounting with powder coated sandy grey 150 (AKONOBEL) finish. aluminum top plate with white or metallised Mosaïque® reflector protected by transparent PMMA. Projector with a ring shielding unnecessary light and an anodized, aluminum reflector, with output such that 97% is contained by top reflector plate, to minimize light pollution. Optical compartment and gear tray, IP65; gear tray compartment, IP54. 5 Nm. 100% indirect lighting, employing 70W/150W MH lamp. As Thorn Aviso.

## Certification

Luminaire shall be certified for Indoor/Outdoor use, wet location, to meet UL 1598 standards and CSA Std. C22.2 NO.250.

# Legend Classic

THORN

A classic shaped range of low light pollution lanterns for application in older cities, towns and historical areas

- Choice of post top or suspended mounting. Both offer the option of an illuminated top cap
- Post top version produces 'virtual glow effect' when lit
- Precise light distribution ensures no direct upward light, and a consequent reduction in light pollution
- The 'Optibloc' internal optic can be rotated in 45° increments to maintain uniform visual appearance and offer different distributions
- The high performance optics are suitable for streetlighting
- Available with medium base Metal Halide ED17 lamp and electronic ballast 70-150W.

## Materials/Finish

Body: die-cast low copper aluminum, dark grey powder coated finish, (close to RAL 9007).

Flat enclosure: tempered glass lens.

Reflector: pure aluminum.

## Installation/Mounting

Recommended mounting height: 13.2' to 16.4'

## Specification

To specify state:

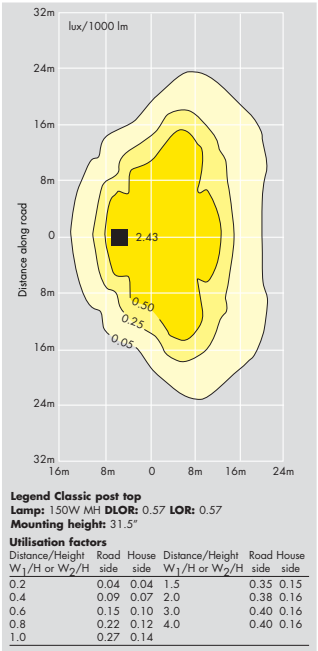

Post top or suspended lantern in die-cast aluminum painted in dark grey finish, flat tempered glass lens, with aluminum reflector embodied in an IP65 compartment. Reflector will provide a light distribution for streetlighting, and will have an upward light output ratio of zero. As Thorn Legend Classic.

## Certification

Luminaire shall be certified for Indoor/Outdoor use, wet location, to meet UL 1598 standards and CSA Std. C22.2 NO.250.

# Legend Modern

THORN

A modern shaped range of low light pollution lanterns mainly dedicated to modern city centers and residential areas

- Choice of post top or suspended mounting
- Precise light distribution ensures no direct upward light, and a consequent reduction in light pollution
- The 'Optibloc' internal optic can be rotated in 45° steps to maintain uniform visual appearance and offer different distributions
- The high performance optics are suitable for streetlighting
- Available with medium base Metal Halide ED17 lamp and electronic ballast 70-150W.

## Materials/Finish

Body: die-cast aluminum, dark grey powder coated finish, (close to RAL 9007). Flat enclosure: tempered glass lens. Reflector: pure aluminum.

## Specification

To specify state:  
Post top or suspended lantern in die-cast aluminum painted in dark grey finish, flat tempered glass lens, with aluminum reflector embodied in an IP65 compartment. Reflector will provide a light distribution for streetlighting, and will have an upward light output ratio of zero. As Thorn Legend Modern.

## Certification

Luminaire shall be certified for Indoor/Outdoor use, wet location, to meet UL 1598 standards and CSA Std. C22.2 NO.250.

# Sylvan Columns for Legend Lanterns

THORN

Designed to complement the Legend range of lanterns, Sylvan columns allow a broad variety of styles to be created

- Dedicated Sylvan columns with three lantern mounting configurations: post-top, single overarm and twin overarm brackets. Choice of post-top columns for Legend Classic or Modern lanterns. Bracket assembly available for suspended Legend Classic or Modern lanterns. See illustrations.

- Columns are crafted from die cast aluminum with laminated wood main section
- Columns are available in 13.12', 19.69' and 26.24' versions. These come complete with tenon for post-top mounting or overarm bracket(s) for suspended mounting

## Installation/Mounting

Columns supplied as flange mounted.

## Material/Finish

Column: conical, tapered column in cast aluminum with laminate wood main section. Column supplied for mounting post top Legend or Sylvan bracket.

Finish: textured dark grey for metal parts and mahogany tint for wood.

## Specification

To specify state:

3.12/19.6/26.25' conical tapered cast aluminum lighting column with wood main section. Flange mounted. With single/twin/overarm bracket/post-top 2.99" shaft/for mounting Legend Classic/Modern lantern.

As Thorn Sylvan column/bracket.

## Certification

Luminaire shall be certified for Indoor/Outdoor. Use, wet location, to meet UL 1598 standards and CSA standards.

# Legend Brackets

THORN

Designed for use with Legend Lanterns, and alternative columns, these brackets compliment the Legend styling to create a harmonized assembly

- Two further styles of bracket are available for use with other column types:
  - Bilam brackets fit 3" Ø columns (QC-TC types recommended) and are available in two configurations: single outreach and twin outreach. Wall mounted bracket version also available. There are two profiles per configuration: with single curvature decoration (version C) or double curvature decoration (version S).
  - Eiffel mid-pole brackets fit 2.36" Ø columns and are offered in the same configurations: single and twin outreach, plus a wall mounted bracket version.
- All Bilam and Eiffel brackets are available to accept Legend Classic or Modern lanterns, in post-top or suspended form.

### Installation/Mounting

Bilam Brackets fit 3" Ø columns. Eiffel mid-pole brackets fit 2.36" Ø cylindrical - tapered columns via a mounting plate with 2 fixing holes at 8.66" centers.

### Material/Finish

aluminum with Steel fixing shaft.

### Certification

Luminaire shall be certified for Indoor/Outdoor use, wet location, to meet UL 1598 standards and CSA Std. C22.2 NO.250.

# Madison 1000

THORN

A large post-top lantern with column, simply designed with an inverted conical shape

Design: Designit

- Glass lamp enclosure has optical prisms at the top with opal sand-blasted glass below to combine an indirect light with a downward, anti-glare, direct light
- Lantern head takes on 'floating' appearance when lit
- Available with medium base Metal Halide ED17 lamp and electronic ballast 70-150W or Compact Fluorescent
- Simple light source replacement by elevation of lantern. Control gear fitted in column

## Materials/Finish

Lantern: aluminum, textured anthracite. Versions available in other textured finishes (black red/ black green/steel blue) to order.  
 Reflector: pressed aluminum, powder coated white on underside.  
 Hemispherical globe: clear, UV resistant polycarbonate.  
 Lamp enclosure: opal acrylic at sides with sand blasted refractor glass in the top.  
 Socket and lock ring: cast aluminum, silver.  
 Column: aluminum, textured anthracite.

## Specification

To specify state:  
 Decorative, conical column and 39.37" Ø lantern in aluminum for long life induction lamp with prismatic glass lamp compartment providing indirect light. IP54.  
 As Thorn Madison 1000.

## Certification

Luminaire shall be certified for Indoor/Outdoor use, wet location, to meet UL 1598 standards and CSA Std. C22.2 NO.250.

MADISON 1000	LANTERN & COLUMN, FLANGE MOUNTED INC. FIXING BOLTS	948	96004364

# Madison 700

THORN

Medium size post-top lantern available with three different column designs - inverted conical, cylindrical or step column

- Designed to complement the Madison 1000 and Madison Bollard/Wall ranges
- Available with medium base Metal Halide ED17 lamp and electronic ballast 70-150W or Compact Fluorescent

### Materials/Finish

As Madison 1000.  
Step column: Galvanized steel.

### Installation/Mounting

Lantern can be mounted on 3 different 9.5' columns:  
Conical/Cylindrical (4.25" ) with ballast in column top.  
Step column (2.36" spigot) with ballast mounted in base.  
Step column door size 3.36" by 15.75".

### Specification

To specify state:  
Elegant 27.56" diameter post top lantern in cast aluminum for indirect lighting with matching cylindrical, conical, or step column. IP65.  
As Thorn Madison 700.

### Certification

Luminaire shall be certified for Indoor/Outdoor use, wet location, to meet UL 1598 standards and CSA Std. C22.2 NO.250.

# Avenue Collection

THORN

A harmonized range of post top lanterns, plus matching options in bollards and wall mounting units. Also included are dedicated columns of appropriate heights.

Here you will find a choice of four lanterns styles, where elegance combined with efficiency forms the design platform, resulting in a wide choice of efficient indirect lighting options. Luminaires from the Avenue Collection can be used in combination or on their own. All solutions give the surroundings a unique architectural appearance.

*Avenue Virtual*

### **Avenue Virtual**

The 'virtual' lantern uses a unique top reflector system combined with a precision light projector, housed in a body finished in a silver grey paint technique. The closed projector achieves 97% containment of output within the top reflector system, minimizing light pollution.

*Avenue F*

### **Avenue F**

Simplified styling is incorporated, offering a clean elegance which can support traditional or modern environments. Dedicated column options are included, plus a wall bracket mounting version.

*Avenue Deco*

### **Avenue Deco**

With the lamp shielded from direct view by decorative inserts, and a high efficiency profiled reflector head, Avenue Deco embodies strong design values with full regard to aesthetic needs. Dedicated columns have optional sleeving, and the offer is completed by a wall mounting lantern, two wall lights, and a bollard.

*Avenue XL*

### **Avenue XL**

A larger version of Avenue Deco for use in areas where higher light output is required, the XL can be used with the Deco bollards and wall mounting units to achieve a harmonized appearance for a project. A wider option of columns is included, in heights to complement the larger lantern size.

# Avenue Virtual

THORN

An elegant, decorative indirect lighting lantern, with a choice of complementary columns

- Luminaire and reflector design give 100% indirect lighting and prevent the spread of light above the horizontal
- Excellent performance: 95% of the light emitted from the light source is captured by the top reflector
- Flat top reflector with multiple rings eradicates glare while controlling the light distribution for excellent uniform illuminance
- Decorative lamp shield provides visual appeal
- Silver effect finish for high visual impact
- Electronic MH ballast in the column 70-150W
- High quality white light
- Wall mounted versions available on request
- XL version with extended top disc canopy

## Materials/Finish

Canopy: die-cast aluminum, powder coated silver colour, textured (close to RAL 9006)  
Top reflector: pressed semi-specular aluminum with clear lacquer protection  
Closure screen: heat resistant Borosilicate glass, coated with weather resistant optical lacquer for optimal transmission of light  
Bowl: pressed anodized aluminum. Outer surface treated for optimal weather resistance  
Lamp shield: UV stabilized PC  
Arm and arm base: die cast aluminum, powder coated silver colour, textured (close to RAL 9006)  
Column: 9.84' aluminum, powder coated anthracite

## Installation/Mounting

Lantern recommended mounting height 9.84'.  
Post-top lantern: suitable for 2.36" Ø x 3.93" long tenon.  
Columns: supplied with four fixing bolts (JT16/14 x 300). 9.84' column tapers from 4.48" Ø to 2.99" Ø with 2.36" Ø tenon.

## Certification

Luminaire shall be certified for Indoor/Outdoor use, wet location, to meet UL 1598 standards and CSA Std. C22.2 NO.250.

# Alumet

THORN

Alumet is an elegant lighting feature, which is suitable for both classic and modern architecture

- Suitable for pedestrian precincts, building surrounds, shopping centers, parks and business centers
- A sleek and minimalist shape provides distinctive lighting effects by night and decorative urban effect during the day
- Exceptional visual comfort
- Electronic ballast ensures energy saving capabilities
- Ideal for creating visual guidance
- White light with good color rendering
- Bollard version available on request

### Materials/Finish

Column: extruded aluminum, 9.84'  $\varnothing$  7.84", finish powder coated light matt grey  
 Top canopy: die-cast aluminum, finish powder coated light matte grey  
 Diffuser: opal impact-resistant acrylic, 3.77',  $\varnothing$  7.87"

### Installation/Mounting

Overall height: 163.4"  
 (with lit part of 45.28")

Easy installation:

1. Ballast is housed inside the pole. Weight of gear is held by safety chain.
2. Base of lamp compartment secures by interior screws to enable a smooth exterior line between pole and illuminated section.
3. Top casting clamps the diffuser in place. Easy access for lamp replacement by using the M6 thread to remove the canopy.

3. Top casting clamps the diffuser in place. Easy access for lamp replacement by using the M6 thread to remove the canopy.

### Specification

To specify state:  
 Decorative lighting column for 2 x 55W TC-L compact fluorescent lamps or LED with powder coated matt light grey aluminum pole.  
 As Thorn Alumet.

### Certification

Luminaire shall be certified for Indoor/Outdoor use, wet location, to meet UL 1598 standards and CSA Std. C22.2 NO.250.
